

Vented Eave Riser

- Enhanced beauty
- Superior fit
- Above sheathing ventilation
- Eave component of the MLT Energy Efficient Roof System - which enhances energy savings when installed with MLT's Elevated Battens and Vented Ridge component.

MonierLifetile's Vented Eave Riser improves the appearance of tile roof installations and increases airflow under your tile roofs. Increased airflow under tile installations can lead to reduced heating and cooling costs. Constructed of painted, galvanized steel for long life, MonierLifetile's Vented Eave Riser products are priced competitively and are installed like standard eave metal.

VENTEDEave Riser

Roof System

COMPONENTS

Part of the MonierLifetile®
Energy Efficient Roof System
